New Street Public Realm Development

PROJECT TIMELINE

Work will continue on the street until Thursday 21 December.

Work will then re-start on Tuesday 2 January.

The project is 80% complete, and we're on track for a Spring 2024 completion, weather permitting.

LIGHTING UP THE HIGH STREET

Two more trees were added last Friday, adding to the natural beauty of New Street.

Installing bench lights and tree up-lighting together will blend practicality and visual appeal.

And that's not all – street lighting columns are also set to be installed this week!

Low-level planters, now fully planted, not only contribute to the greenery but also provide practical seating areas, complimented by six newly installed benches.

Plus, a big shoutout to Huddersfield BID, who will be helping to take care of the planters, ensuring they stay litter free and as vibrant as ever!

But wait, there's more! Once the project is complete we will be retro-fitting a stunning poem by Simon Armitage to the street.

We are retrofitting the poem after the main works are done as it helps get the detailed artistic work done with better precision and control.

Wishing you all a great festive period and here's to an even better New Year on New Street.
